CPYRGHT

No boom or bust for modern prospectors Pam and Jerry Spray (below). Paid by the hour to extract test cores of rock for mining companies, the husband-and-wife team never knows what geologists find in their samples. But here, along the divide in southern New Mexico, copper would be a good bet. Near Silver City lie two of the nation's largest copper mines, one of them owned by Phelps Dodge Corporation (right). Asked about special requirements for her job, Pam said: "You have to be able to lift about a hundred pounds. That's all."
